The larynx houses the vocal folds, and that is why it is commonly referred to as the ' voice box '. It is situated just below the pharynx - the part of the neck and throat situated immediately behind the mouth and nasal cavity and cranial, and above the esophagus, larynx and trachea (the "windpipe").

...

Without breath there would be nothing to power the voice, or even to ensure that the vibration of the vocal folds can be heard. Quite simply, the voice cannot exist without the breath. The Thoracic Diaphragm is a trampoline-like dome-shaped muscle stretched across the abdominal cavity, separating the organs of the chest cavity from those in the lower abdominal cavity.
