This book addresses the need for tests that can diagnose the strengths and weaknesses in learners' developing foreign language proficiency. It presents the rationale for, and research surrounding, the development of DIALANG, a suite of internet-delivered diagnostic foreign language tests funded by the European Commission. The word 'diagnosis' is common in discussions in language education and applied linguistics, but very few truly diagnostic tests exist. However, the diagnosis of foreign language proficiency is central to helping learners make progress. This volume explores the nature of diagnostic testing, emphasizing the need for a better understanding of the nature of appropriate diagnosis. The book starts with a debate about how diagnostic testing might most appropriately be developed. Charles Alderson argues that the field has neglected to construct diagnostic tests, partly because other forms of testing have dominated the field. Alderson examines how proficiency has been diagnosed in the key areas of language: reading, listening, writing, grammar and vocabulary. The value of self-assessment is discussed and exemplified as a key component in developing learners', and teachers', awareness of the complexity of language learning. The book ends with a consideration of and recommendations for future developments in the diagnosis of foreign language proficiency.

Pass ECDL5 Using Microsoft Office 2007, covers the full ECDL syllabus providing everything learners need in an accessible, user-friendly format. This title includes step-by-step instructions and screenshots that guide students through the learning points enabling them to develop all the skills they need to pass the test. Learning objectives of each module are outlined clearly in an introduction, and throughout the book Ask yourself' sections help students to check that they have met all the criteria. Mock tests offer practice and help to build students' confidence, and are also linked to the syllabus references making it easy for teachers to identify any weaker areas amongst their learners. A downloadable grid shows how the book matches the syllabus giving peace of mind that students are covering what they need to.

Brilliant ECDL is the complete fully-accredited guide to passing the ECDL 4.0 examination for self-learners. With close to a million people in the UK alone studying the ECDL syllabus, the benefits of this easy-to-use guide are endless. The ECDL (European Computer Driving Licence) is an internationally-recognised, objective, standardised, and certificate of end-user computing skills. To qualify for the licence, candidates have to pass seven tests of PC knowledge and skill in the common business applications (wordprocessing, database, spreadsheets, presentations and the Internet). With ECDL registrations in the UK increasing monthly, the qualification is becoming more widely recognised as a desirable and mandatory certification of basic entry-level computing, IT skills and knowledge. With this rise in validation, more and more individuals are becoming aware of the need to gain the qualification for themselves, rather than as part of a company training plan or initiative. Traditional training guides can be unwieldy and make it hard to get the information you need right away. Brilliant ECDL allows you to find the information you need easily and with minimal fuss, guiding you through each task using a visual step-by-step approach. Fully-updated to cover all 7 modules of the ECDL 4.0 Syllabus using the most popular business software, Microsoft Windows XP, Microsoft Office XP, and Internet Explorer 6, Brilliant ECDL is the perfect solution to all ECDL students' needs.

This IBM® Redpaper™ publication gives a broad understanding of a new architecture of the IBM Power System E950 (9040-MR9) server that supports IBM AIX®, and Linux operating systems. The objective of this paper is to introduce the major innovative Power E950 offerings and relevant functions: The IBM POWER9™ processor, which is available at frequencies of 2.8 - 3.4 GHz. Significantly strengthened cores and larger caches. Supports up to 16 TB of memory, which is four times more than the IBM POWER8® processor-based IBM Power System E850 server. Integrated I/O subsystem and hot-pluggable Peripheral Component Interconnect Express (PCIe) Gen4 slots, which have double the bandwidth of Gen3 I/O slots. Supports EXP12SX and ESP24SX external disk drawers, which have 12 Gb Serial Attached SCSI (SAS) interfaces and support Active Optical Cables (AOCs) for greater distances and less cable bulk. New IBM EnergyScale™ technology offers new variable processor frequency modes that provide a significant performance boost beyond the static nominal frequency. This publication is for professionals who want to acquire a better understanding of IBM Power Systems™ products. The intended audience includes the following roles: Clients Sales and marketing professionals Technical support professionals IBM Business Partners Independent software vendors (ISVs) This paper expands the current set of Power Systems documentation by providing a desktop reference that offers a detailed technical description of the Power E950 server. This paper does not replace the current marketing materials and configuration tools. It is intended as an extra source of information that, together with existing sources, can be used to enhance your knowledge of IBM server solutions.
