Il modello di sviluppo, ormai accettato a livello globale, non si sta rivelando sostenibile e necessita di essere rapidamente rivisto. La crescita economica illimitata e il deterioramento conseguente dell'ambiente richiedono politiche eco-compatibili, che non mettano a repentaglio la nostra sopravvivenza.

[DOC] Il Senso Ritrovato Il Senso Ritrovato Wikisource: Online library of user-submitted and maintained content. While you won't technically find free books on this site, at the time of this writing, over 200,000 pieces of content are available to read.

Stiamo vivendo una crisi sistemica, epocale, che non riguarda solo l'economia e la finanza, ma anche l'ecosistema, il nostro mondo di valori e la cultura su cui si è basata finora la nostra vita su questo pianeta. Di fronte a una crisi di queste proporzioni, occorre mettere in discussione il paradigma in base al quale si è organizzata la nostra società. Il modello di sviluppo, ormai accettato a livello globale, non si sta rivelando sostenibile e necessita di essere rapidamente rivisto. La crescita economica illimitata e il deterioramento conseguente dell'ambiente richiedono politiche eco-compatibili, che non mettano a repentaglio la nostra sopravvivenza. Questo libro è scritto da diversi autori molto conosciuti nei loro rispettivi campi: filosofia, economia, biologia, medicina, mondo dei media e della comunicazione. Il filo conduttore del volume è l'informazione che ha originato l'Universo e ha permesso la nascita della vita sulla Terra, un'unità organica, un flusso di dati che è a rischio ogni volta che gli uomini pensano esclusivamente a soddisfare i propri interessi.

A look at the future of medicine based on cutting-edge stem cell research Shares Dr. Biava's groundbreaking research on stem cell differentiation stage factors (SCDSFs) as a cellular reprogramming treatment for cancer and other degenerative diseases Explains how SCDSFs restore communication between cells and the epigenetic code, the information that programs the normal function and growth of every living cell Explores how the universe operates like a cosmic information-network and how this new scientific worldview will shape the future of healing and medicine The universe is not a mechanical system of matter--it operates like a cosmic network that runs on and is connected by information. Information in-forms and underlies all of the physical world, including the human body. In this book, Pier Mario Biava, M.D., and Ervin Laszlo, Ph.D., show how this information worldview can be applied to healing and medicine and, specifically, how it underlies a revolutionary new approach to cancer and disease treatment, one that works directly with the epigenetic code--the information

that programs the function and growth of every living cell. The authors explain how tumor growth and cellular dysfunction are manifestations of disconnections in the information network of an organism. Unveiling Dr. Biava's groundbreaking research on stem cell differentiation stage factors (SCDSFs), they explain how SCDSFs work directly as epigenetic regulators to reconnect aberrant cells to the body's information network and reset them to their original function--in the case of cancer cells transforming them from malignant to benign, from dysfunction back to normalcy and health. Dr. Biava's research on SCDSFs--derived from Zebrafish embryos, which have a very high percentage of proteins identical with those of human beings--has shown good success in reprogramming and inhibiting cancer cells in clinical trials with patients with advanced liver cancer, as well as success in in vitro studies with 7 different human tumor lines. SCDSFs have also shown promise in the treatment of chronic diseases such as psoriasis and neurodegenerative diseases. This research will also allow the development of new treatments for Alzheimer's, Parkinson's, and multiple sclerosis. Unveiling the holistic future of medicine, the authors show how we will no longer need to approach the treatment of cancer and other degenerative diseases as a "fight," but as a restoration of our cells' original programming. With the advent of Information Medicine, we now have the power to program ourselves to heal.

Socrates, Or On Human Knowledge, published in Venice in 1651, is the only work written by a Jew that contains so far the promise of a genuinely sceptical investigation into the validity of human certainties. Simone Luzzatto masterly developed this book as a pièce of theatre where Socrates, as main actor, has the task to demonstrate the limits and weaknesses of the human capacity to acquire knowledge without being guided by revelation. He achieved this goal by offering an overview of the various and contradictory gnosiological opinions disseminated since ancient times: the divergence of views, to which he addressed the most attention, prevented him from giving a fixed definition of the nature of the cognitive process. This obliged him to come to the audacious conclusion of neither affirming nor denying anything concerning human knowledge, and finally of suspending his judgement altogether. This work unfortunately had little success in Luzzatto's lifetime, and was subsequently almost forgotten. The absence of substantial evidence from his contemporaries and that of his epistolary have thus increased the difficulty of tracing not only its legacy in the history of philosophical thought, but also of understanding the circumstances surrounding the writing of his Socrates. The present edition will be a preliminary study aiming to shed some light on the philosophical and historical value of this work's translation, indeed it will provide a broader readership with the opportunity to access this immensely complicated work and also to grasp some aspects of the composite intellectual framework and admirable modernity of Venetian Jewish culture in the ghetto.

What is the contribution of General System Theory to the macro-level understanding of economic, social and technological changes in our epoch from a multidimensional perspective? What is the contribution of Social Action Theory on a micro-scale? Can complex scenario analyses, although based upon uncertainty and unpredictability, offer a viable toolkit for managing these transformations? This book contains twelve chapters, dealing with these questions from various points of view. It brings together essays in sociology, economics, law and humanities to provide as complete a representation as possible of the current global situation. The theoretical framework adopted here is that the systemic approach provides the most effective tool both for understanding social phenomena and elaborating policy-modelling strategies for decision makers that are supposed to tackle social criticalities.

This volume is the first of the series Corollaria Crustumina aimed at the publication of conference proceedings, doctoral theses and specialist studies on the Latin settlement of Crustumerium (Rome). It contains multidisciplinary papers of an international group of archaeologists discussing new fieldwork data on Crustumerium's settlement, cemeteries and material culture in light of the site's cultural identity.

LUCA FALACE INVENTION AND PATENT TO DEFEND HIMSELF FROM THE CORONAVIRUS WORLD HEALTH ORGANIZATION ANNOUNCEMENT, TO THE MINISTRY OF NATIONAL HEALTH, TO THE MINISTRY OF NATIONAL DEFENSE AND CONFINDUSTRIA: INVENTION AND PATENT OF LUCA FALACE INFO: dott.lucafalace@gmail.com ANNOUNCEMENT AGAINST CORONAVIRUS: I make available my non-profit, at a national and international level, my Patent: (patent application filed in the year 2018) Eco-Thermodynamic Suit, for engineering and production against contagion from viruses and bacteria. My PATENTED INVENTION (YEAR 2018) in addition to stabilizing the temperature of the human body, ALLOWS THE PHYSICAL INSULATION; THERMAL, ANAEROBIC, ASEPTIC OF THE HUMAN BODY. (Detailed description in patent attachments) THIS WOULD ALLOW CITIZENS TO BE ABLE TO LEAVE THE HOUSE AND PROTECT ALL INSTITUTIONAL FIGURES AT ALL LEVELS, IN PARTICULAR ALL INSTITUTIONAL FIGURES, AS REGARDS THE MEDICAL AID, ASSISTANCE AND SURVEILLANCE IN ZONE OF PANDEMIA AND AGAINST CONTACT FROM VIRUSES AND BACTERIA. I am available for free, for the engineering of my patent providing all my documentation and patent attachments; helping in this sense the national and international system. Below I have reported some specifications of my invention to be realized and produced, on a national and global scale. They are available free of charge, to help the system and national and international institutions. Luca Falace Patent Application: Aseptic Eco-Thermodynamic Suit year 2018. Inventor and owner of the Patent: Luca Falace INTRODUCTION Dear reader, I would like to make available to the world community an invention of mine and my patent, filed in 2018, against virus infection. Right now humanity is struggling to start fighting this new virus, corona virus. I filed a patent in the year 2018, with all the explanations, to make my invention. I would like to make my invention available to humanity. How can we do? I don't want money, and therefore I don't want my project to be for profit, but to help the humanity I love. How can we do? 1. I want to make available my invention and my non-profit patent. 2. I want to carry out my invention together with all interested readers, entrepreneurs, companies, countries, nations. 3. I don't want to make the invention, to make money, but to help people around the world against the crown-virus. invention and free of charge, I am available to carry out the engineering, if there was an entrepreneur, or a company, which would produce my invention. How can we do? If you are a scholar, you could recommend this book, create word of mouth. If you are not an entrepreneur, in order to produce this invention, it does nothing, you can adopt all your ideas, to be able to spread this invention. In doing so, maybe someone will come and decide to make it happen. And therefore help today and in the near future, all humanity in the event of a pandemic. Thank you.
