As recent research suggests, the skin of many frogs is a potential global pharmacopeia for the treatment of certain medical conditions such as pain or Alzheimer's Disease(1). It is this characteristic, a remarkable skin, that draws attention to anyone who runs into a frog of the Dendrobatidae family. Commonly known as Poison Frogs, many of the species in this large family have a very vivid skin ...

I have one caveat about recommending the reference. In another book published the very same year by this author ("Poison Frogs of the Family Dendrobatidae : Jewels of the Rainforest" the author provides volumes about the biology of these frogs in their native environment but has minimal information about their care in captivity.

Introduction To Poison Dart Frogs. The Dart Frog hobby is still fairly new to the world, especially within Canada. In fact some of the species we work with at Jungle Jewel Exotics, such as the *Ranitomeya benedicta* and the *Ranitomeya summersi* were only discovered and documented by science in 2008. They are truly amazing animals, with striking colors ranging from bright orange, yellow, red, blue ...
