With some 6,000 species of plants, Texas has extraordinary botanical wealth and diversity. Learning to identify plants is the first step in understanding their vital role in nature, and many field guides have been published for that purpose. But to fully appreciate how Texas's native plants have sustained people and animals from prehistoric times to the present, you need Remarkable Plants of Texas. In this intriguing book, Matt Warnock Turner explores the little-known facts—be they archaeological, historical, material, medicinal, culinary, or cultural—behind our familiar botanical landscape. In sixty-five entries that cover over eighty of our most common native plants from trees, shrubs, and wildflowers to grasses, cacti, vines, and aquatics, he traces our vast array of connections with plants. Turner looks at how people have used plants for food, shelter, medicine, and economic subsistence; how plants have figured in the historical record and in Texas folklore; how plants nourish wildlife; and how some plants have unusual ecological or biological characteristics. Illustrated with over one hundred color photos and organized for easy reference, Remarkable Plants of Texas can function as a guide to individual species as well as an enjoyable natural history of our most fascinating native plants.

This book analyses changes in gender relations, as a result of globalization, in countries on the semi-periphery of power. Semi-periphery refers to those nations which are not drivers of change globally, but have enough economic and political security to have some power in determining their own responses to global forces. Individual countries obviously face challenges that are to some extent unique, although the prescriptions for economic and social restructuring are based on a common competitive logic. Remapping Gender in the New Global Order draws on examples from four countries on the semi-periphery of power but still located in the top category of the UNDP 's Human Development Index. At one end is Norway, one of the world 's richest and most developed welfare-states, and, at the other, is Mexico, a country that is considerably poorer and more susceptible to the power of the United States and international agencies. Australia and Canada, the other two semi-peripheral countries examined, are in the middle. Also included are comparisons with the epicentre of the 'core' base of power — the United States. The individual chapters focus on the effect on specific groups of people, including males and indigenous groups, the mechanisms people use to both cope with dramatic social changes, and the strategies and alliances that are used to affect the course of changes. It covers topics that range from implications of labour migration on care regimes to globalism 's effect on masculinity and the 'male breadwinner' model.

Remarkable MIRACLES ...Far more than this world dreams What happens when we devote our lives to prayer? How does prayer change our circumstances? Why does God want us to pray? You will be amazed by G.C. Bevington's diligence, and astounded by all (God shows to him when he spends five days in a hollow log, nine days under a tree, and seventy-two hours in a haystack in prayer. G.C. Bevington was a simple man. He had a remarkable relationship with God. Travel with him through the southern countryside as he brings faith in God to the people he encounters - solving problems, rejoicing in the miracles of God's provision, and finding the keys to healing.

A wall went up around Alex Brady 's heart when his father, a New York firefighter, died in the Twin Towers. Turning his back on the only woman he ever loved,

Alex shut out all the people who cared about him to concentrate on fighting crime. He and his trusty K9 partner, Bo, are determined to eliminate evil in the world and prevent tragedies like 9-11. Then the worst fire season in California ' s history erupts, and Alex faces the ultimate challenge to protect the community he serves. An environmental terrorist group is targeting the plush Oak Canyon Estates. At the risk of losing his job, and his soul, Alex is determined to infiltrate the group and put an end to their corruption. Only the friendship of Clay and Jamie Michaels—and the love of a dedicated young woman—can help Alex drop the walls around his heart and move forward into the future God has for him.

A supercharged, international, Internet adventure. Ned is a wizard with a computer. The king of the remote control. He adores snakes, lizards, and skinks, but people are less appealing. Less reliable. Ned is . . . Remote Man. What will it take to peel away his protective layer of indifference? How about a mother on the edge? A wild cousin from the Northern Territory? A sudden extended trip to the States? A goofy new neighbor? Nope, it ' ll take a snake. Or two – one an endangered Australian python, and the other a smuggler who sells wild animals to the highest bidder. When Ned discovers what this animal poacher is doing, his anger forces him into action. Now Remote Man is more like a superhero or super sleuth – tracking down clues and enlisting the help of some Web-wise teens. Can five kids on four continents linked only by the Internet manage to foil a very real-world criminal? You bet your Oenpelli python they can.

New, Now, Next. Consumers ' ever growing appetite to acquire new products and their short courtship with them has kept manufacturers busy not only expending resources at an alarming rate, but also depleting these resources and giving rise to waste and pollution at a correspondingly increasing and disturbing rate. Traditional manufacturing methods that use mainly virgin materials to produce new products and dispose of the used products at the end of their lives are quickly becoming unsustainable. In addition, regulations that require manufacturers to take back products and dispose of them responsibly have forced manufacturers to establish dedicated facilities for product recovery—systems that minimize waste and maximize remanufacturing and recycling. Remanufacturing Modeling and Analysis explores the design, planning and processing issues encountered in remanufacturing systems and provides examples of quantitative modeling methodologies to deal with them. The book covers the history, industry size and potential, comparison with other end-of-life options, benefits, conditions, challenges, and steps in a typical process. It provides a brief overview of each of the industrial engineering and operations research techniques used in the book and explains the models developed to increase the remanufacturability of product designs. The book also discusses how increasingly stringent environmental regulations and decreasing natural resources influence manufacturers toward more environmentally conscious manufacturing and product recovery initiatives. With easy-to-use mathematical or simulation modeling that demonstrates solutions for each remanufacturing issue, the book helps practitioners understand how a particular issue can be effectively modeled and how to choose the appropriate solution methodology. An in-depth look at quantitative analysis for remanufacturing systems, the book provides a foundation upon which to build a body of knowledge in this fast and growing area.

Remembering A Phenomenological Study Second Edition Edward S. Casey A pioneering investigation of the multiple ways of remembering and the difference that memory makes in our daily lives. A Choice Outstanding Academic Book "An excellent book that provides an in-depth phenomenological and philosophical study of memory." —Choice "... a stunning revelation of the pervasiveness of memory in our lives." —Contemporary Psychology "[Remembering] presents a study of remembering that is fondly attentive to its rich diversity, its intricacy of structure and detail, and its wide-ranging efficacy in our everyday, life-world experience.... genuinely pioneering, it ranges far beyond what established traditions in philosophy and psychology have generally taken the functions and especially the limits of memory to be." —The Humanistic Psychologist Edward S. Casey provides a thorough description of the varieties of human memory, including recognizing and reminding, reminiscing and commemorating, body memory and place memory. The preface to the new edition extends the scope of

Remembering Cosmopolitan Egypt examines the link between cosmopolitanism in Egypt, from the nineteenth century through to the mid-twentieth century, and colonialism. While it has been widely noted that such a relationship exists, the nature and impact of this dynamic is often overlooked. Taking a theoretical, literary and historical approach, the author argues that the notion of the cosmopolitan is inseparable from, and indebted to, its foundation in empire. Since the late 1970s a number of artistic works have appeared that represent the diversity of ethnic, national, and religious communities present in Egypt in the nineteenth and early twentieth centuries. During this period of direct and indirect European domination, the cosmopolitan society evident in these texts thrived. Through detailed analysis of these texts, which include contemporary novels written in Arabic and Hebrew as well as Egyptian films, the implications of the close relationship between colonialism and cosmopolitanism are explored. This comparative study of the contemporary literary and cultural revival of interest in Egypt ' s cosmopolitan past will be of interest to students of Middle Eastern Studies, Literary and Cultural Studies and Jewish Studies.
