Customary measuring units worksheets - Homeschool Math

Units of volume in the customary measurement system are complex. There are eight ounces to one cup, two cups per pint, two pints per quart and four quarts per gallon. Converting between units that are far apart on this scale requires multiplying a large number of constants, for examples to get fluid ounces to gallons the conversion is $(8 \times 2 \times 2 \times 4) = 128$ ounces per gallon.
