Industrial engineering is an engineering profession that is concerned with the optimization of complex processes, systems, or organizations by developing, improving and implementing integrated systems of people, money, knowledge, information, equipment, energy and materials. Industrial engineers use specialized knowledge and skills in the mathematical, physical and social sciences, together with the principles and methods of engineering analysis and design, to specify, predict, and evaluate the

Industrial engineering - Wikipedia

Industrial Engineering and Facility Design Consultants Dynamic business conditions create the need to frequently re-evaluate a company's use of space to optimize investment and cost. Over time, incremental changes to facility designs lead to improper space planning and less than optimal use of capital.

Industrial Engineering - DeHart Consulting

Each company that hires an industrial engineer, either as a consultant or as an internal manager, has its own specific limitations. An industrial engineer must quickly become an expert not only in the manufacturing and production processes of the industry, but also in the specific culture, problems, and challenges that the company faces.
