Gen III/IV engines are typical V-8s with respect to the cooling system, so they do not require huge radiators or special metals. What they do require is a radiator that is rated for the job. With the smallest LS engines easily making 300 hp, you don't want to use a stock 4-cylinder or V-6 radiator.

### LS SWAPS: Accessory Drives and Cooling System Guide

This is comparable to Mercury Marine's five-year or 1000-hour extended-life coolant for Mercury engines. However, some engine-makers recommend changing out the coolant every two years. Obviously, the best bet is to follow your engine manufacturer's recommendations on maintaining

### **Gm V8 Ls3 6 2l Engine Cooling System Diagram**

Here is the coolant flow cycle as described in the service manual for the LS2. The LS3 should be the same. Cooling Cycle Coolant is drawn from the radiator outlet and into the water pump inlet by the water pump. Some coolant will then be pumped from the water pump, to the heater core, then back to the water pump.

I just took delivery of a 2010 Wakesetter with the LS3. I was told by the dealer not to sit and idle for a long time or the engine will overheat. On the first day out while driving 5 miles an hour in a no wake zone the engine overheating warning went off. I put it into neutral and rev'd the engine and the temp went down.
